(File Photo)

GUWAHATI: With the COVID-19 pandemic creating the need for sanitizations of workplace and vehicles, Assam-based startup Automovill is engaged in sanitization of vehicles used by government machinery.

This start up is funded by NEDFI Venture Capital Limited (NVCL). The North Eastern Development Finance Corporation Ltd (NEDFI) is a state-run financial institution.

This startup's 'Work from Home' solution can get enterprises on their feet in two days

The company stated that while almost all organizations in India have to accommodate for the sudden outbreak of the Coronavirus, most of the employees are still struggling to work from home which has led to drastic decrease in overall productivity.

EnCloudEn is currently helping a few of the departments

GUWAHATI: A startup has come up with a 'Work from Home' solution that gets enterprises back on their feet in two days.

EnCloudEn VPNless VDI establishes a secure connection between any personal device of the employee and their office workstation. Not just that, any enterprise apps or data is also readily available in these virtual desktops or VDI as it is more commonly known.

CHANGE IS INEVITABLE

"It is not the
strongest species
that survives, nor the
most intelligent, but
the most responsive
to change."

Charles Darwin
